CAREER OBJECTIVE

A self-motivated computer science undergraduate aiming to contribute to **dynamic software** projects while expanding expertise in **scalable** web development and **secure** backend architecture. Seeking a challenging role to apply my technical skills and build **impactful, user-centric** solutions while continuously learning and contributing to **innovative technology-driven** projects.

EDUCATION

Bachelor of Technology in Computer Science	Noida, In
Dr. A.P.J. Abdul Kalam Technical University (2022 – 2026)	81.2 %
Senior Secondary Education (PCM)	Lucknow
Lucknow Public Schools & Colleges (2021 – 2022)	72.6 %
Secondary Education	Lucknow
Lucknow Public Schools & Colleges (2019 – 2020)	83.1 %

PROFESSIONAL EXPERIENCE

PPAP Automotive Limited	Noida, In
Graduate Engineer Trainee	November 2025 – Present
- Developed an interactive KPI Dashboard & Measurement Tracking System using React.js for frontend and integrated structured datasets for real-time visualization of performance metrics. - Designed and implemented RESTful API-based data flow to manage, fetch, and update operational data efficiently. - Built a Digital Monitoring System to replace manual tracking processes with an automated and structured workflow, improving data accuracy and accessibility. - Implemented role-based access control Logic, allowing only authorized administrators to assign and manage tasks.	

TECHNICAL SKILLS

Programming Languages: C/C++, Java, Python, SQL, JavaScript, HTML5/CSS3

Frameworks & Tools: React.js, Node.js, Express.js, PostgreSQL, Git, Github, VS Code, Firebase, Eclipse PyCharm

Core Competencies: Data Structures & Algorithms (DSA), Problem Solving, PostgreSQL, Agentic AI

PROJECTS

ImageForge: (Node.js, Express.js, React.js, MongoDB)	<u>Project Link</u>
- Created a text-to-image web application utilizing the Clipdrop API to generate high-quality AI-generated visuals from user input. - Integrated Razorpay API to support secure, streamlined payment processing for image generation services. - Built robust backend services with Node.js and Express.js to handle user requests, manage transactions, and trigger image generation workflows. - Used MongoDB to securely store user data and transaction records, enabling usage tracking and personalized account features.	

AI Powered Chat Application: (Node.js, Express.js, React.js, PostgreSQL)	<u>Project link</u>
- Designed and developed a full-stack AI chat platform with real-time message streaming and persistent conversation history. - Implemented GitHub OAuth authentication using NextAuth.js with secure session handling. - Built RESTful APIs in Node.js to manage conversations, messages, and chat streaming workflows. - Designed PostgreSQL schema with Prisma ORM for efficient storage of users, conversations, and messages.	

Inventra: (React.js, Node.js, Express.js, PostgreSQL)
- Developed a full-stack inventory and asset management system to manage stock updates, asset assignments, and real-time inventory tracking through a centralized dashboard. - Built secure authentication functionality using JWT and bcryptjs with login, signup, session persistence, and protected user access workflows. - Implemented dynamic dashboard analytics and responsive charts using Chart.js to visualize total, available, and assigned assets with live database integration. - Designed and integrated RESTful APIs using Express.js and PostgreSQL for inventory management, assignment workflows, dashboard reporting, searching, and filtering functionalities.

COURSES & BADGES

Certificate Course on MongoDB Basics (ICT Academy Learnathon)

- Learned NoSQL database fundamentals, including data modeling and CRUD operations using MongoDB.

Pitch Cypher (Lloyd Institute of Engineering & Technology)

- Secured Second Runner Up spot.
